SEA TECHNOLOGY INDEX
Volume 19, 1978

This is a three-part, instant-reference index of technical material and news appearing in Sea Technology magazine, Volume 19, 1978. Part One, Monthly Contents; Part Two, Authors; Part Three, Subject Index. Numbers following title, author or subject are month and page number.

PART ONE MONTHLY CONTENTS

January 1978

Whither NACOA? *Editorial* ... 7
Soundings ... 9
Review and Forecast ... 10
Law of the Sea: Past, Present and Future ... 11
U.S. Citizens — Stewards of Rich Fishing Grounds 11
Pluses and Minuses ... 12
A New Look at Burgeoning Marine Education ... 13
1978 — A Year of Decision in Oceanic Affairs ... 13
Investment Protection Needed For Deepsea Mining Companies ... 17
Ocean Dumped Industrial Waste Cut 90% ... 19
Resolving Conflicting Uses of Oceans Is Most Important ... 20
Fishery Enforcement - 1,340 Boardings In Six Months ... 22
More Coastal States Initiate Zone Management ... 24
Fisheries Gain Prominence And Concern ... 26
Sea Grant Develops Commercial Potentials ... 29
U.S., Canada Await Offshore Bonanza ... 30
Countermeasures in Undersea Warfare Receive More Emphasis ... 32
Letters ... 33
Capital Report ... 36
Ships & Structures ... 37

INTRODUCING: THE PORTABLE DIGITAL SURVEY FATHOMETER® THE DSF-600 FROM RAYTHEON.

The new Raytheon DSF-600 provides the best combination – digital depth display, chart recorder display and digital output (BCD) in one survey system. The DSF-600 handles all your depth survey requirements, in depths from 0-310 ft. or fathoms (metric model: 0-124m or 0-620m) . . . with accuracy of ±0.25 ft. up to 100 ft. . . . and 0.25% of indicated depth over 100 ft. And it provides these additional features:

- Operating frequencies of 40kHz and 200kHz
- Adjustable sound speed, tide and draft compensation
- Programmed TVG (time varied gain)
- Automatically switching 6-phase recorder
- Automatic bottom tracking and acquisition
- Automatic numerical chart-scale annotation

Many other operating features and options make the DSF-600 one of the most useful and versatile survey Fathometers® available. Get complete data. Contact the Marketing Manager, Raytheon Company, Ocean Systems Center, Portsmouth, R.I. 02871 U.S.A. (401) 847-8000.

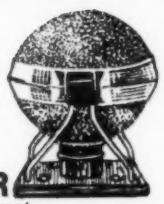
LENSREF

DIELECTRIC MICROWAVE LENS



RADAR REFLECTOR

Built To Last A Lifetime!
Unlimited Applications!

FEATURES:

10 Times Larger Than Radar Cross-Section Of Corner Reflectors! Non-Directional, No Power Required, No Dead Angle! Completely Watertight! Corrosion Resistant!

USES:

Make Your Boat Look Like A Ship On Radar Scopes! Object Identification For Safety Of Navigation, Channel Markers, Buoys, Rigs, All Marine Structures!

NEW . . . LOW COST

UNDERWATER LIGHT DETECTORS

Series SEA-010 and SEA-100
. . . for the measurement and detection of optical radiation underwater. A spectral range of 325nm to 1100nm can be monitored with choice of detectors. Pulse light integration speeds as fast as 5 nanoseconds to d.c.

FEATURES:
* Low Cost.
* Every unit is depth tested to 41 meters (135') and carries a one year warranty.
* Rugged package construction utilizing 1/2" thick quartz optics.
* 100' cable includes RF and EMi shielding.
* Compatible with I.L. Radiometers and Photometers.
* Can be used with optical filters for spectral studies.

APPLICATIONS:
* Absorbtion studies.
* Pollution detection.
* Plant Growth studies.
* Biological studies at air - ocean interface.
* Underwater communications.
* Bioluminescence.
